

How to Customize Columns:

1. Add Label or Memo Components:

- Place them in the Detail Band for data.
- Place corresponding header labels in the Header Band for column titles.

2. Assign Tags via UserName Property:

- Set the component's UserName to one of the predefined tags below.
- Tags must include the underscore character (`_`) at the start and end.

Available Tags:

Label Tags (Display Group Codes):

- `_GROUP1_` → Group 1 code
- `_GROUP2_` → Group 2 code
- `_GROUP3_` → Group 3 code
- `_GROUP4_` → Group 4 code
- `_GROUP5_` → Group 5 code

Memo Tags (Display Detail Info):

- `_SUBREFVAL1_` → Sub Reference Value 1
- `_EXPIRYDATE_` → Expiry Date

Example Usage:

- Add a *label* to the Detail Band, set *UserName* = `_GROUP1_`.
- Add a *label* to the Header Band with *Caption* = "Group 1".
